ATTACHMENT #1

Recognizing the labor, equipment, and other costs realized by the Township in addition to the price provided by respondents for picked up materials, the Township will add a cost factor to the respondent's total bid price for picked up materials in an attempt to capture these additional costs. The following is how this cost factor will be calculated. As per its adopted 2014 fee schedule, the Township bills at a rate of seventy-seven dollars (\$77.00) per hour for a single axle truck with operator with a hauling capacity of ten (10) tons. For purposes of this calculation, a rate of \$77.00 per hour will be used as the rate. To determine the amount of time which it takes to pick up the material, Bing Maps will be used to calculate the time of travel between the Penn Township Municipal Campus, 97 North Penryn Road, Manheim, PA 17545 and the pickup location. The unmodified route selected by Bing Maps will be the route used for purposes of calculation and the number of minutes calculated will simply be multiplied by two to determine the round trip cost. In the event that Bing Maps provides multiple routes to the pickup location, the shortest route in terms of travel time will be used to calculate the cost factor. To determine the number of trips necessary to pick up the material, the total weight being bid will be divided by 10.

Formula

$$\$77.00 \times (m/60) \times (v/10) = \text{Cost Factor}$$

m= minutes roundtrip

v= total weight of material being bid

If applicable, decimals will be rounded to the nearest hundredth.

****NOTE THAT BIDS WILL BE AWARDED ON THE BASIS OF THE AGGREGATED TOTALS AND NOT ON THE BASIS OF THE TOTALS FOR INDIVIDUAL LINE ITEMS. AS SUCH, THERE WILL BE ONE CONTRACT FOR ALL MATERIALS FOB AND ONE CONTRACT FOR ALL MATERIALS DIRECTED DELIVERY. (Directed delivery is to 97 North Penryn Road, Manheim, PA)**

****RESPONDENTS MUST BID ON ALL THE ITEMS THAT THEY ARE ABLE.**
